## Skills

Motion Design  
HTML5+CSS  
SASS/Less  
Responsive Web Design  
Javascript libraries  
iOS/AndroidKaiOS  
Develop Web Services  
Python

## Development Projects

Ecommerce Webstore - I created a fully functional webstore from scratch using javascript, css, and html5. features include a products gallery, a shopping cart, and interactive calender for customer updates.  
-HTML5/SASS&CSS/Javascript  
-Challenges

- > Responsive Navigation
- > Icon, and media responsiveness
- > slow loading with javascript with input validation

I overcame these challenges by using hamburger navigation, and using AA ratio color schemes. I also input my javascript into the bottom of my code, to help the page run quicker. The input validation functions well on mobile and desktop browsers.

## Certifications

Adobe CC Certified Expert
